3skeng - 3D conceptual engineering

innovative engineering software for SketchUp

[home »](#)[products »](#)[download »](#)[3s library »](#)[background »](#)[support »](#)

Do you know the feeling that you have a good idea but no way to express it?

We knew it too well and decided to do something about that...

What can be done?

We at SHK searched for an easy to use and fast 3D software for space management purposes. We found Google SketchUp and are impressed with its intuitive handling and efficient way of lifting conceptual planning right up to the third dimension.

We soon came to know that architectural design can be done amazingly fast, but as we handle pipes, air ducts and cable trays, we soon reached the limits with the "on-board tools" for conceptual engineering tasks.

How can we break the speed limit?

As every challenge called for its successful encounter, we developed tools that made our 3D-related day-to-day business a lot faster and significantly more efficient.

3skeng was born...

We combined our tools in powerful plug-ins which turn SketchUp into a conceptual engineering tool for layout and space management of equipment, pipes, air ducts and cable trays. We call these plug-ins **3skeng** which is the synthesis of **3D**, Google **S**ket^hUp and its application to the field of **e**ngineering.

Conceptual engineering in 3D easier and faster than ever before

With 3skeng we will make the following benefits available:

- > high-speed developing of engineering concepts
- > quick response to changes and variants
- > passing the speed barrier to allow real-time changes during meetings
- > cost savings which are the result of the higher efficiency and better conceptual design

3skeng is made for you

Are you an engineer-, planner or pipe fitter working in the building technology-, semiconductor-, solar-, opto-eletronics-, chemical, life science-, petrochemical-, water treatment-, food-, biochemical-, pharmaceutical-, ship building-industry?

Are engineering of piping-, ventilation- or exhaust systems part of your work?

If any of this applies to you, 3skeng is most likely the best choice for you.
